

**SOLANO**  
high-end performance

## **Wherever you go**

The bags are packed! The excitement felt at the start of a new day and when you head in an unknown direction is the inspiration behind SOLANO's latest spring/summer 2019 collection. Our new daring design reflects the desire to discover new things, and focus on life's possibilities rather than its limitations.

Our sunglasses collection will boast crystal frames, available either as a transparent or opal glass-like option. Octagon-shaped models, fitted into a fine metal frame, will provide a vintage look. Flat, graded lens with a reflective layer will make sure you stand out in the crowd. Glasses embellished with colourful and lively printing, such as bands, geometrical and marine shapes, or timeless flowers, will become a key part of any wardrobe. The colours in the collection will remain bright and vividly contrasting: from navy blue to various shades of pink and pastels, evoking the colours of nature.

Solano combines innovative, good-looking technology with the latest fashion trends. Solano sunglasses are equipped with excellent polarising lenses (PC and TAC) fitted with a professional UV filter. They effectively eliminate glare and improve visual clarity, ensuring that you see better and your eyes are fully protected from harmful sunlight.

One thing is certain: no matter where you're going, the Solano 2019 collection will offer the perfect glasses for that trip!
